

EC1600 Economy Plastic Welder

Low cost Hot Air Plastic Welders

Electronic temperature control

Plug-in quick change elements

Range of nozzles & accessories

Full range of plastic welding rods

Fishing Industry Services introduce an economy range of hot air plastic welding tools. A low cost plastic welding tool suitable for use by DIY welders and schools. The tools are especially suitable for use by schools and training institutions to teach plastics technology students.

The plastic welders are affordable and ease to use.

The welders are ergonomically designed with in-line handgrip and rubber "tool rest". The tool is well balanced and weighs 1450g including power cable. The integrated electric motor means that a compressed air supply is not required. A standard 10A power socket is all that is required to run the tool.

The temperature is infinitely adjustable from ambient to 600 deg C with the rotary dial.

The tool is double insulated for electrical safety.

Supplied with all stainless steel plastic welding nozzles and accessories, ready to go.

A range of optional stainless steel nozzles, accessories and plastic welding rods available.

The economy hot air welding kit contains the following :

- 1 x Economy 230V 1600W Welder
- 1 x Welding Nozzle 5mm dia.
- 1 x Tacking Nozzle
- 1 x Speed Welding Nozzle
- 1 x Rotary Burr
- 1 x Weld Rod Starter Pack
